Portfolio: My portfolio

CAREER OBJECTIVE

Software Engineer and Computer Science graduate with a strong foundation in programming, IoT, Arduino, and web development. Experienced in designing and implementing innovative technical solutions and passionate about applying my skills in practical and professional environments. Eager to grow as a versatile and capable professional, continuously enhancing my technical expertise, problem-solving abilities, and contributing effectively to innovative projects across diverse sectors.

EDUCATION

Bachelor's Degree in Computer Science
Faculty of Computers and Information, KFS (Graduation Year: 2024)

WORK & EXPERIENCE

Programming Instructor
Demi iSchool (Online & Offline) Feb 2025 –Sep 2025

- Teaching interactive programming courses to students aged 9 to 16

Programming & Arduino Instructor
ST Smart Technology Kafr El-Sheikh Oct 2024 – Jan 2025

- Delivered in-person training on programming fundamentals and Arduino development

Arduino & IoT Experience (Across Roles)

- Practical experience in working with Arduino boards and various sensors

Front-End Web Development – Freelance & Academic Projects

- Designed and developed responsive web interfaces using HTML, CSS, Bootstrap, and Tailwind. Participated in various educational and service-based projects using JavaScript, Python, and C#.

PROJECTS

Time To Travel Website:

- In this project I used HTML, CSS and JavaScript
- The idea of the site is based on tourism and helping tourists choose places to stay and eat, and recommending tourist activities and tourist places.
- I worked on designing the website's appearance and programming.

Homz Website:

- The idea of this site is simple and similar to an e-commerce site where you display and buy furniture.

Pet Lover Website: 🔗

- The idea of a very simple website for animal lovers and those interested in them and their health. On this website, I used only tailwind.

Smart Home:

- This project presents the idea of a smart home by using many sensors, such as light, temperature, smoking, movement, touch, and control of home appliances.

Car Robot:

- In this project, a car robot was made that moves via Bluetooth and can also move by following the line.

Smart City:

- This project presents the idea of how we can transform an ordinary city into a smart city that responds to technology
- by controlling light bulbs, traffic lights and homes.

Fire Detector Robot:

- This is a project and a challenge at the same time in a competition held by Smart Technology at the Engineers Syndicate in Alexandria.
- I made a robot car that follows the line, detects the fire, sends a message over the phone with the fire alarm, and also displays on the screen the number of the burning house.

IOT Project:

- This is a project that relies more on the Internet of Things.
- I used the MQTT platform and the MOT IOT KIT application.
- Controlling the movement of images using Mobile's Orientation, the appearance and disappearance of objects using the Proximity Sensor, and lighting using the Light Sensor.

GYM Management System: 🔗

- I worked with my team on this project.
- This is desktop Management System By Python Language.
- This is a gym management system in which the use of a camera is provided to record the player's image and then ensure security for future entries.
- Some data is recorded, stored, and displayed within the system when needed, and is modified automatically.

Desktop application for Clinic: 🔗

- This is Windows Forms app with C#.
- Simple Clinic System To record and display data.

COURSES & CERTIFICATES

- Robotics Level 1
- Smart Technology Challenge II
- Arduino Board Basics
- Course At Information Technology Institute In IOT
- Course at C Sharp language
- Course at Python language
- English Course at UK English Academy (Advanced Level)
- Digital Marketing (google)

TECHNICAL SKILLS

Front-end Framework:

- HTML
- CSS
- JavaScript
- Bootstrap
- Tailwind

IOT Framework:

- Java Script
- Database MySQL
- MQTT Platform

Arduino Framework:

- Arduino IDE
- Tinkercad Simulator

General Concepts:

- OOP
- Algorithm & Data Structure
- Git & GitHub
- Skilled AI Tools Utilization

PERSONAL SKILLS

- Teamwork & Collaboration
- Effective Communication Skills

- Problem-Solving & Analytical Thinking
- Creativity & Innovation
- Adaptability & Flexibility
- Time Management & Organization
- Presentation & Public Speaking Skills
- Leadership & Mentoring Abilities
- Attention to Detail
